

<http://http.easyphone-ip.com/SvtSendSms?user=usuario&password=contrasena& number=52222222222&message=Test%20from%20my%20account>

or

<http://167.114.28.227/sms/SvtSendSms?user=usuario&password=contrasena& number=52222222222&message=Test%20from%20my%20account>

Where:

user: your user in the application

password: your password exactly as it was saved, with upper and lowercase

number: phone number you want to send the message with country code included

message: message coded for url, for example if you want to put a space put %20

If message were received successfully in our platform you will receive:

```
{"result":"sent:1","idsms":77629444}
```

Where idsms is a unique identifier our system assigns to your message

If you put a message with more than 160 characters:

```
{"warning":"message truncated","result":"sent:1","idsms":77629445}
```

Your message is received and processed but message is truncated to 160 characters and inform you. idsms is a unique identifier our system assigns to your message

If your message has an error you will receive:

```
{"result":"ERROR Invalid client"}
```

Where possible errors:

Invalid client

No country found

Invalid number format: only digits

Length of phone number invalidates

Tariff not found

Exhausted balance
